

MPC helped increase my yield!

“Since working with the team at MPC I’ve increased my average yield to 4.5t/ha. Higher yield means more income and better profit for the farm. It’s that simple and that good!” Rick Paine*

**Winner AMS Small Farm Category Most Sound Kernel Per Hectare 2009*

MPC is at the forefront of assisting farmers with progressive farming practices to increase your return.

We are committed to improving your crop yield and optimising the quality of your NIS to maximise your profit.

Our regular grower field-days provide practical support for growers to apply the latest macadamia industry research and developments.

Our partnership with growers is the core to our success and the success of our growers.

Just one of the benefits of being with MPC. And remember **you don't need to be a shareholder to supply** your NIS to MPC.
